

BACKGROUND

Tower Health is a premier Hospital and Healthcare system based in Pennsylvania USA which brings together more than 11,000 team members, 2,000 nationally recognized physicians, specialists and providers across 65 convenient locations including 7 key not-for-profit hospitals. Tower Health manages population health and promotes wellness, delivers healthcare that is readily accessible, compassionate and of the highest quality and value. Tower Health engages with multiple community programs together with clinical research and education of healthcare professionals.

APPROACH

Tower Health was concerned about containing and improving infection control measure within the group and in particular in respect to the growing infection rate within a newly acquired, formerly failing hospital St Christopher's Hospital for Children in Philadelphia. Meetings were held with the senior leadership including Chief of Surgery, Director of Infection Prevention, OR Services Manager and the Chief Medical Officer.

The THOR UVC® systems are deployed throughout the entire group of Tower Health and are a regular feature of their marketing:

SOLUTION

Analysis of Finsen Tech's THOR operational excellence and superior power verses all other available product and , as Tower Health is an experienced user of UVC technology, they compared with the then current incumbent UVC product.

THOR with more power, more technology, ease of use and outstanding efficacy, huge value with price at less than half that of weaker offerings was chosen as the preferred technology.

RESULTS

8 THOR units were ordered, deployed across 7 hospital sites and commissioned. Comprehensive operator training took place.

The growing increase of cases was reversed and Tower Health is an example of excellence for THOR.
